System Programming HOMEWORK#4
NAME : dubo
CCU ID: 404410905

Project files :Makefile fishing.c

(Explain project files:)
[Makefile] Just gcc command.
[fishing.c] This file,include the main function.The program have three signal sigint and sigtstp.When run this program。The init status are ready。When press ctrl +c.invoke the function recvsig.The function alarm can control the time,and send signal .

(Important note to run your code)
When i write this code,i don't know about signal about SIGINT,SIGALRM,SIGTSTP.And the program logic i can't write it.Then i Google it.Then i find a similar program.Then i learn it,
